

TRANSPORTATION MODELING

Imagine an efficient warehouse. Seamlessly fulfilled orders, carriers arrive on time and customers are satisfied. The dynamic force of Blue Yonder Transportation Modeling (TMOD) takes “what-if” scenarios and turns them into answers. Proactively plan your shipments, optimize your operations and find the best path forward for cost-saving solutions.

The Ascension Advantage

- ✓ Customized service based on your needs; end-to-end full service to solution
- ✓ 25+ years of collective experience in Logistics Procurement
- ✓ 100% ROI in less than a year for most cases

About Ascension Logistics

Accelerating the digitization of the world’s supply chain by providing best in class technology adaptation services, engineering simpleness, and optimizing customer experience through viable long-term partnerships.

Reduced Cost

Continually identify the most efficient and lowest-cost network to satisfy business needs.

Maximize Loads

Configure single loads to have multiple deliveries. Consolidated shipments reduces loads and overall costs.

Optimized Operations

Navigate disruptions with powerful “what-if” scenarios driven by patented algorithms.
