

LOGISTICS PROCUREMENT

Procurement can be frustrating and time consuming. But when using Blue Yonder Logistics Procurement, a robust bid optimization platform specifically designed for transportation, you save time, manage the data and process to find the right balance of cost vs. service, all within one unified system.

Our Service

Ease of Access

Single web-based system with secure login. Facilitate optimized transportation procurement for all modes.

Bid Collaboration

Save time by enabling carriers to upload rates (bids) themselves. Secure user roles to manage, create, analyze and award bids.

Cost Savings

The optimization engine seeks the lowest overall network cost, while considering all business rule constraints, that maximize costs savings. Less resources from end-to-end engagement.

The Ascension Advantage

Customized service based on your needs; end-to-end full service to solution training

25+ years of collective experience in Logistics Procurement

100% ROI in less than a year for most cases

Observed savings of
5-20%
of total FUM

About Ascension Logistics

Accelerating the digitization of the world's supply chain by providing best in class technology adaptation services, engineering simpleness, and optimizing customer experience through viable long-term partnerships.
